

DuroBall is one tough suspension bushing

DuroBall from SuperPro is the smartest and toughest suspension bushing you can get

Vertical pivot bushes are now very commonly used by OEM engineers to precisely locate control arm pivot points to the chassis. This solution provides great benefits in location precision but has its own inherent weaknesses that can lead to premature failure.

SuperPro has developed a unique metal and polyurethane hybrid design for this demanding application. Combining the core strengths of **SuperPro's** engineered polyurethane coupled with a specialised metal ball joint, the **DuroBall** design delivers all the articulation benefits of a vertical pivot solution with greater durability and service life.

The range also includes Grip Dynamics performance kits with "Extra Positive Caster"

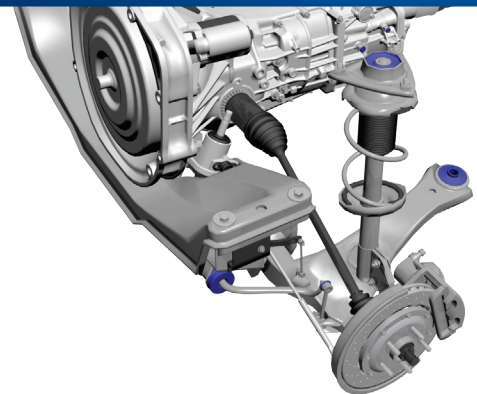

DuroBall technology features

- ✓ Super tough metal poly hybrid design
- ✓ More precise steering and handling
- ✓ A stiffer bushing with engineered ride compliance
- ✓ Greater durability, longer services life
- ✓ Grip Dynamics options with **EXTRA** positive caster

"We reckon its the toughest AND smartest bushing kit around. The best of all worlds with EXTRA caster performance options too"

Graham Scudamore-Smith - Superpro Australia

Ask your dealer about SuperPro Duroball for the following applications - range is constantly growing

Make	Model	Year	Part Number	Note
Mitsubishi	Evo 7	01-03	DURO3739K	
Mitsubishi	Evo 7	01-03	DURO3741K	With Grip Dynamics for EXTRA positive caster*
Mitsubishi	Evo 8	03-05	DURO3739K	
Mitsubishi	Evo 8	03-05	DURO3741K	With Grip Dynamics for EXTRA positive caster*
Mitsubishi	Evo 9	05-08	DURO3739K	
Mitsubishi	Evo 9	05-08	DURO3741K	With Grip Dynamics for EXTRA positive caster*
Mitsubishi	Evo 10	07-	DURO3439K	
Mitsubishi	Evo 10	07-	DURO3441K	With Grip Dynamics for EXTRA positive caster*
Subaru	GH8 STI	08-	DURO3736K	
Subaru	GH8 STI	08-	DURO3738K	With Grip Dynamics for EXTRA positive caster*
