VERTICAL PIVOT BUSHINGS

SuperPro continues to be at the forefront of replacement suspension bushings.

Manufacturers are more often using lower control arm bushings on 4WD and front wheel drive vehicles which incorporate a bush pivoting in the vertical plain.

Replacement SuperPro V.P.B. (Vertical Pivot Bushings) has allowed the introduction of a range of bushings which offer -

1. Cost effective repair by replacing the bushing and not the complete arm.
2. Caster correction bushings for improved performance and wheel alignment correction.

SuperPro using all the existing features, knurling, resilience, bonding and quality steelwork have engineered V.P.B. bushings with unique designs to suit the following vehicles.

*DAEWOO Nubira
*FORD Mondeo
*HONDA DC5 Integra
*HYUNDAI Santa Fe
*HYUNDAI Sonata
*LEXUS ES300
*TOYOTA Camry SPV10 & VDV10
*TOYOTA Corolla AE101R, AE102X
AE112 Series II
*TOYOTA Calibra
*GOLF MK2, MK3, MK4
