

**NEW RELEASE**

# **SUPERPRO 4x4 ROLL CONTROL SWAY BARS**

**SuperPro Roll Control have identified a need to upgrade or add sway bars on many 4WD vehicles.**

Once a vehicle is lifted the standard bars cannot control the roll of these vehicles under normal driving conditions, plus, add some accessories, a roof rack or a load and the need is highlighted even more. Many 4WD utilities have no rear sway bar at all!

**SuperPro Roll Control** sway bars are proven to reduce body roll and increase stability on the highway. We have designing these bars from the ground up, to ensure no loss of off-road articulation and ride comfort.

Made in Australia from the best quality Australian spring steel, these sway bars come with a **“No Exclusions”** Lifetime Warranty!  
4WD **Roll Control** Sway Bar Range includes:
