

Range Rover Sport

SuperPro has released suspension bushings for both front and rear of this vehicle.

In the development of the bushes, critical design considerations have been taken into consideration to produce an upgrade improves the handling characteristics of these vehicles.

The end result of fitting a SuperPro upgrade is a vehicle that feels far more grounded, brakes and turns in far better than an OE vehicle, with no harshness or NVH.

A perfect upgrade to put the "Sport" into a Range Rover Sport!
