

Nissan Pathfinder R51 2005-2012

SuperPro have released suspension bushings for both front and rear of this vehicle. The front suspension bushings have been designed as either standard replacement or with camber adjustment for alignment correction and extreme adjustment for lifted vehicles.

The same has been done for the rear suspension. As the rear is an independent design, any change to the ride height in the rear will interfere with the camber. SuperPro bushings with camber adjustment in both the upper and lower control arm position will ensure that, whatever the circumstance, a solution can be found!

Front

Control Arm Upper Inner – Standard	SPF3022K
Control Upper Inner – Adjustable +/- 0.5 Degree Camber Change	SPF3022XK
Control Arm Lower Inner – Standard	SPF3023K
Control Arm Lower Inner – Fixed 0.5 Degree Camber Change	SPF3024K
Control Arm Lower Inner – Adjustable +/- 1 Degree Camber Change	SPF3024XK

Rear

Control Arm Lower Inner – Standard	SPF3974K
Control Arm Lower Inner – Adjustable +/- 0.5 Degree Camber Change	SPF3975K
Control Arm Upper Inner – Standard	SPF3976K
Control Arm Upper Inner – Adjustable +/- 0.5 Degree Camber Change	SPF3977K
