

Chrysler 300C 2004-2012, Dodge Challenger 2009-2011, Charger 2005-2010 & Magnum 2005-2010

SuperPro have designed and released a complete set of high performance polyurethane bushes for all of the front and rear suspension arms for these vehicles. As always, the priority in the design and production of these performance parts is to create a product that delivers significant improvements over the OEM rubber bushings, and these new parts do just that!

Upgrading to SuperPro bushes gives these vehicles noticeable improvements in their handling characteristics, particularly when cornering and braking, with no increased noise or harshness.

Fitting these vehicles with SuperPro bushes allows the suspension to be tuned, helping to take their handling performance to the next level.
