

New Release

Scion FRS Rear Lower Adjustable Control Arm

SuperPro Roll Control has released a Camber Adjustable Rear lower Control Arm for the Scion FR-S.

This hi-strength, adjustable Rear Lower Control Arm provides +/- 2.0 degrees of camber change for the popular FR-S.

With an easy to adjust with a cam located at the outboard end of the arm.

Designed for the ultimate in performance and handling, these arms deliver strength, adjustability and more positive arm location with SuperPro Bushings.

All arms are finished in our SuperPro blue powder coat for maximum anti-rust protection.
