

## Isuzu D-max & Holden Colorado RG

SuperPros latest addition to the range of high quality, polyurethane suspension bushings are the front upper and lower control arm bushings, as well as the rear leaf spring bushings for the current model Isuzu D-Max and Holden Colorado. In addition, a new bolt-on rear Sway Bar has been developed. Upgrading to SuperPro Bushings and adding the Roll Control Sway Bar will result in a noticeable increase in the control and steering response as well as adding cornering stability.

Designed to improve the handling, directional stability and braking performance, without any unwanted NVH. These bushings offer the perfect upgrade for those wanting to enhance the handling characteristics of these vehicles.

The SuperPro Bushings and the Roll Control Sway Bar are particularly well suited for lifted and loaded vehicles, helping to further increase handling performance both on and off-road.
